1. About this handbook

This handbook explains how to use the clinic system day to day. It is written for everyone who uses it: the clinic owner (Admin), Doctors, Secretaries and Patients. You do not need any technical knowledge.

Read **Section 2** first. After that, go straight to the section for your role. You do not need to read the other roles' sections.

Who does what

Role	Main job in the system	Section
Patient	Books appointments, checks schedules, views records and bills.	4
Secretary	Handles bookings, check-ins, clinical records and payments.	5
Doctor	Sees the patients of the day, records each visit, sets working hours.	6
Admin	Manages staff accounts, services and prices, reports and backups.	7

How a patient visit flows through the system

Every visit follows the same path. Each step is done by a different person:

1. **Booking** – The patient books online, or the secretary adds a walk-in.
2. **Approval** – The secretary approves the booking and assigns a doctor.
3. **Arrival** – On the day, the secretary marks the patient as arrived.
4. **Visit** – The doctor sees the patient, writes the findings and finishes the appointment.
5. **Record and bill** – The secretary completes the clinical record and adds the charges.
6. **Payment** – The secretary records the payment (full or by installment). The patient can see it in their portal.

2. Getting started (everyone)

Opening the system

Open a web browser (Google Chrome is recommended) and go to the clinic website address given to you by the clinic. The home page shows the clinic's services and a **Book an Appointment** button.

Logging in

1. Click **Login** on the home page.
2. Type your email and password.
3. Tick the security check box if one appears.
4. Click **Login**. The system opens the pages for your role.

Patients can also click **Sign in with Google** if their Google email is the same email the clinic has on file.

If you forgot your password

1. On the login screen, click **Forgot password?**
2. Enter your account email. The system emails you a 6-digit code.
3. Type the code, then enter and confirm your new password.

A good password has at least 8 characters, with an uppercase letter, a lowercase letter, a number and a symbol.

Finding your way around

- The **menu on the left** lists the pages you can use. Click a name to open it.
- The **bell icon** at the top shows your notifications, such as new bookings or approvals.
- Your **profile picture** at the top right opens your Profile, Settings and **Logout**.
- A small **! icon** beside a title explains what that page or box is for. Hover over it or tap it to read the help.

Automatic logout

To protect patient information, the system logs you out if you are inactive for a while. A warning appears about a minute before. Click anywhere to stay logged in.

Role	Logged out after no activity for
Patient	15 minutes
Admin	1 hour
Secretary	2 hours
Doctor	Not logged out automatically. Always log out when you leave the computer.

3. Messages the system sends automatically

The system reminds patients and staff without anyone pressing a button:

When	What is sent	To whom
A booking is made	A 6-digit code to confirm the booking, then a reference number	Patient (email)
The clinic approves or moves a booking	An email with the date and time	Patient
1 day before the appointment	Appointment reminder	Patient (email)
1 hour before the appointment	Reminder notification	Patient and secretary
Patient did not arrive	A missed-appointment message	Patient (SMS / email)
1 day before an installment is due, and 1 day after it is late	Payment reminder	Patient (email)

> **Tip:** Appointments that are still not started by 11 PM are automatically marked as **No-Show**, and the time slot is freed.

4. For Patients

Booking an appointment (no account needed)

1. On the clinic home page, click **Book an Appointment**.
2. Fill in your name, email, phone number and birthdate.
3. Pick your preferred **Appointment Date** (clinic hours are 9 AM to 4:30 PM) and write the reason for your visit.
4. Agree to the Terms and Conditions and click **Book Appointment**.
5. Check your email for a **6-digit code**. Type it in and click **Confirm Appointment**. No code? Check your Spam folder, click **Resend code**, or choose **Send via SMS**.
6. You will see **Booking Request Received!** and your **Reference Number**. Write it down.

The clinic will review your request and email you once it is approved. Your patient account is created from your booking, so the next time you can log in instead.

Checking your booking

On the home page, type your **Reference Number** in the booking tracker to see if your booking is pending, approved or moved.

Using your patient portal

To log in the first time, use **Sign in with Google** with the same email you booked with, or click **Forgot password?** to set your own password.

Page	What you can do there
Dashboard	See your next appointment and recent activity. You can also leave a review of the clinic here.
Appointments	See all your appointments. Click **Make an Appointment** to book, or **Reschedule** to ask for a new date.
Services	View the clinic's services and prices.
Clinic Records	View your treatment history and dental chart.
Billing	See what you owe, what you have paid, and your installment schedule.

Asking to reschedule

1. Go to **Appointments** and click **Reschedule** on the appointment.
2. Choose a **Preferred New Date** and **Preferred Time Slot**, then click **Submit Request**.
3. The secretary will approve or reject it. You will get a notification either way. To cancel instead, call the clinic at **0917 984 3031**.

5. For Secretaries

The secretary runs the front desk: bookings, arrivals, clinical records and payments. Your menu has: Dashboard, Patients, Appointments, Doctor Schedule, Arrivals, EHR Queue, Records, Billing, Services and Contact Us.

Your daily routine

1. Open **Dashboard** to see today's numbers and anything waiting for you.
2. Approve new online bookings in **Appointments**.
3. Mark patients as they arrive in **Arrivals**.
4. After the doctor finishes a visit, complete it in **EHR Queue**.
5. Collect payments in **Billing**.

Handling online bookings

1. Go to **Appointments**. New requests appear under **Pending**.
2. Open a booking to view the **Booking Details**.
3. Click **Approve** to accept it, or **Reject** if it cannot be served.
4. Fill in or check the patient's details in **Patient Profiling**.
5. Choose the doctor and time, then click **Assign Doctor & Confirm**. The patient is emailed automatically.

Use **Reschedule Booking** to move the date, or **Cancel Booking** to cancel it.

Walk-in patients

For a patient who comes in without a booking, click **Check In Today (Walk-In)** in **Appointments**. If the patient is new, the system creates their portal account and emails them a temporary password.

Reschedule requests from patients

Requests appear under **Pending Patient Reschedule Requests**. Click **Approve** or **Reject**. The patient is notified.

Doctor Schedule

Shows each doctor's working hours and days off. You can ask to change a doctor's hours, but the change only takes effect **after the doctor approves it**.

Arrivals (checking patients in)

Shows today's expected patients. When a patient arrives, click **Confirm Arrival**. The patient then appears on the doctor's list. If they do not come, click **No-Show**.

EHR Queue (after the doctor)

Lists visits the doctor has finished that still need a clinical record and a bill.

1. Open the patient's visit from the queue.
2. Check the services the doctor recorded. Use **Add Charge** for anything extra.
3. If the patient needs return visits, set the first follow-up date, how many months apart, and the number of visits. The system books them for you.
4. Click **Create Clinical Record**. Use **Print** if the patient wants a copy.

Billing (receiving payments)

1. Go to **Billing** and find the patient's bill.
2. Apply a **Senior** or **PWD** discount if the patient shows a valid ID.
3. Click **Record Payment** and enter the amount received.
4. For an installment plan, enter the down payment. The system schedules the remaining payments and reminds the patient before each due date.

Other pages

Page	Use it to
Patients	Add a patient, update contact details, or look up a patient's history. If the admin has switched it on, you can also click **Add past visit** to enter old paper records.
Records	View and print clinical records.
Services	View the list of services and prices.
Contact Us	Read messages sent from the website. Click **Check Gmail** to bring in emails sent to the clinic's Gmail.

6. For Doctors

Your menu has: Dashboard, Appointments, Schedule, Patients, My Patients Today, Patient Visit and Clinical Records.

Seeing your patients for the day

1. Open **My Patients Today**. Patients appear here once the secretary marks them as arrived.
2. Click a patient to open the **Patient Visit** screen.
3. Review the patient's profile and past records.
4. Write your **Clinical findings** and update the **Dental chart** by clicking on the teeth.
5. Add the **Services done this visit** and upload photos if needed.
6. Click **Finish Appointment**. The visit is sent to the secretary's EHR Queue for billing.

> **Tip:** Click the patient's photo on the Patient Visit screen to see their full details, such as allergies and medical history.

Your schedule and working hours

Open **Schedule** to see your appointments by day and to manage your availability.

- **Change your hours:** set your working hours for a date range and the weekdays you choose. Your own changes take effect right away.
- **Requests from the secretary:** if the secretary asks to change your hours, you will get a notification. Approve or decline it.
- **Days off:** send a **Leave Request**. The admin approves it. Patients booked on those days are told to reschedule.

Other pages

Page	Use it to
Appointments	See all your upcoming and past appointments.
Patients	Look up any of your patients and their history.
Clinical Records	Read and print the records of past visits.

7. For the Admin

The admin manages the system as a whole. The admin can also open every page the secretary uses.

Page	Use it to
Dashboard	See clinic totals, charts and today's activity. You can ask the built-in assistant questions about the numbers.
Manage Users	Add staff accounts (doctors and secretaries) and set accounts to Inactive when someone leaves.
Services	Add services and change prices. Patients see the new prices right away.
Doctor Management	Manage doctors' profiles and schedules, and approve or decline leave requests.
Billing	View all bills and payments.
Reports	View income and appointment reports. Use **Compare** to compare two periods, and **Export CSV** to open the data in Excel.
Reviews	Read reviews left by patients.
System Logs	See who did what and when, including logins.
Backups	Make, download and restore copies of the database.

Adding a staff member

1. Go to **Manage Users** and click **Add User**.
2. Enter their name and email, choose the **Role**, and set a **Temporary Password**.
3. Save, then ask them to change the password on first login.

Allowing past-visit entry for old paper records

In **Patients**, open the settings (gear) icon and switch on **Allow the secretary to add past visits**. Confirm with your password. The secretary can then enter old visits, treatments and unpaid balances. Switch it off when done.

Backups

A backup is a full copy of all clinic data. If daily backups were set up during installation, one is made every day; you can also make one at any time. **Backups contain private patient information, so keep downloaded copies safe and never share them.**

1. Go to **Backups** and click **Create Backup**.
2. Click **Download** to save a copy on a USB drive or in safe storage.
3. Use **Restore** only if data was lost or damaged. Restoring replaces everything with the copy you choose.

8. Common questions

Problem	What to do
I cannot log in.	Check your email for typos. Use **Forgot password?** After 5 wrong tries the account locks for 15 minutes.
The patient did not get the code or email.	Ask them to check Spam, click **Resend code**, or use **Send via SMS**. Check that their email is spelled correctly.
No time slots show for a date.	The doctor may be fully booked, on leave, or not working that day. Try another date or doctor.
The patient is not on the doctor's list.	The secretary has to click **Confirm Arrival** in **Arrivals** first.
A finished visit has no bill yet.	Open **EHR Queue** and create the clinical record. The bill is created from it.
I was logged out by myself.	You were inactive for too long. Log in again. Unsaved changes may need to be entered again.
The page looks wrong or will not load.	Refresh the page (press F5). Check your internet. If it continues, tell the admin.

Keeping patient data safe

- Never share your password. Each person must use their own account.
- Log out when you leave the computer, especially on shared computers.
- Do not download or print records unless you need them.
- Tell the admin right away if you think someone used your account.

Need help?

Contact the system administrator or the clinic owner. Patients can call the clinic at **0917 984 3031**.
